Steel Belted VF Farm Tires

Increase Traction & Reduce Compaction

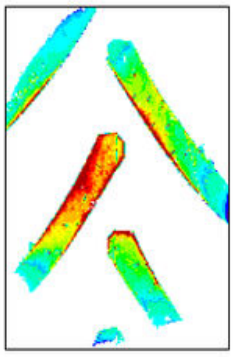

VF (Very High Flexation) Tires

A larger tire contact area reduces soil compaction, increases traction efficiency, improves fuel efficiency, and overall operating productivity.

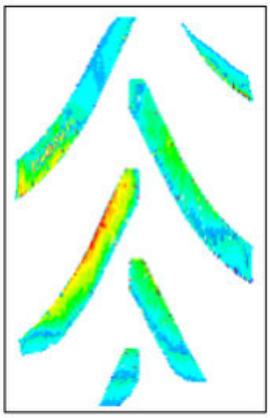

40% less pressure for the same load capacity or
40% more load capacity with the same pressure

Fabric Belted: VF

710/70R38, STD Tyre
Load – 6300 kg @ 35 psi
Footprint –cm²

Steel Belted: VF

VF 710/70R38, VF Tyre
Load – 8750 kg @ 35 psi
Footprint –cm²

A radial steel belted tire footprint area is **10% higher** than fabric belted tire

Traction You Trust. Savings You'll Notice.

Pattern Notes: VF - Very Flexible SB- Steel Belted

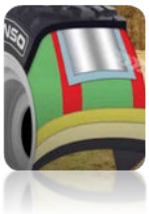

MULTI-PURPOSE TIRE FOR AGRO-INDUSTRIAL APPLICATIONS

- Specific block tread design enables high performance on snow-covered as well as on sandy terrains
- D speed rating - greater load carrying capability at higher speeds

Extra Strong Casing with High Performance Steel Belts:

- Radially stiffer carcass, enough to absorb impact and stress and returns its original shape.
- SB offers better impact resistance and exceptional puncture resistance to enhance tire more durable.

Multi-Block Tread Design with Wider Footprint:

- Excellent grip in all terrains
- Minimizes soil compaction
- Used in multi-purpose applications, like municipal applications
- Excellent self-cleaning properties

Turn Big Savings Into Better Performance
Claim Your Rebate Today

- Rebates issued in the form of credit to dealers 45 days from receipt of the end-user sales invoice.
- Rebate applies only to qualifying sizes listed on this sheet.
- Promotion requires a two-tire minimum purchase and has a 12-tire maximum per invoice
- Dealer expected to purchase additional VF SKUs with received credits
