Why Steel-Belted VF Tires Are a Must

**VF Tires =
VERY HIGH FLEXION tires**

VF Tires Increase Traction
& Reduce Compaction

➔ 40%

40% less pressure for the same load capacity
or

40% more load capacity with the same pressure

Explore Ascenso's innovative range of VF Tractor, Harvester, Implement, and Sprayer tires at AscensoTiresNA.com

Why Use Inflation Systems?

Change tire pressure on the go - higher pressures on the road handle heavy loads at higher speeds. *Time is Money!*
Lower pressure in the field - reduce compaction and increase yields. *CTIS pays for itself usually in 1-2 years!*

Increase Income Per Acre Instantly

Increase your bottom line instantly with proper tire inflation in the field and on the road.

Reduce Compaction & Increase Soil Health

With proper tire inflation, there is less soil compaction leading to better soil health & more room for root growth.

Increase Traction, Larger Footprint & Power To The Ground

Reduced tire inflation in the field leads to better traction and power to the ground. Get in field sooner after the rain.

Improve Fuel Economy

Increased tire inflation on the road leads to faster and safer travel as well as better fuel economy.

Increase Tire Life

Research has proven that proper tire inflation increases overall tire life. Save money by replacing tires less often.
