Product name: BOSS PT 65....(2/2)

BOSS PT 65– MACHINE DEMAND:

- Frequently employed to transport containers from the port to different locations, such as intermodal facilities, distribution centers, and warehouses
- Loading and unloading of containers is involved.
- Perfect for short-distance container transportation, such as moving containers from a ship to a port storage area
- Containers are seamlessly transferred between various forms of transportation and are essential to international trade and logistics.

MACHINE DEFINATION: A trailer or container chassis used in port operations and shipping is commonly referred to as a "port trailer". The purpose of these trailers is to move shipping containers to and from intermodal facilities, ports, and container yards. In the maritime shipping industry, they are essential to the movement of cargo.
